EB - Q

A Comprehensive Solution for Veterinary Care

Plug waterproof design

High-capacity battery for enhanced battery performance and true usability and durability

***Pluggable**

- Linear array transducers
- Comprehensive selection of transducers
- Equine dedicated transducer
- Curved array transducers

EB - Q

Doppler color ultrasound system or Black and white version

- Functional Uses. The device is intended for reproductive imaging of small and large animals as well as basic equine tendon imaging.

- Software Measurement Package. Early pregnancy and gestational age measurement (cattle, horses, pigs, sheep, camels, donkeys). Backfat thickness, eye muscle area (pig, cow) Tendon measurement (horse)

- Parameters: Display: 8/11-inch high-resolution flat panel device. Probe 128 arrays, 256 levels of gray scale. Backfat eye muscle area measurement: distance, length, area and circumference, ellipse, angle, heart rate. Image storage: tablet storage for up to 1000 images.
